Summary

Full-stack web developer with well-rounded experience in real-world projects. Always eager to learn new technologies and improve development skills. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

Experience

Full-stack Developer

Ninja Development LLC

Jun 2021 - Sep 2023 (2 years 4 months)

- Technologies: React, React Native, Angular, Vue, Material UI, Chakra UI, TailwindCSS, Storybook, Node.js, Ruby on Rails, Laravel, Firebase, Vercel, AWS, Azure DevOps.
- Description: During my tenure as a contractor at Ninja Development LLC, a top-rated web and mobile app development company, I played a pivotal role in several projects across diverse sectors, including healthcare, fitness, e-commerce, real estate, and SaaS platforms utilizing the latest technologies. Collaborating closely with a dynamic team, I contributed to the company's mission of delivering reliable virtual and application services, ensuring client satisfaction and timely project completion.

Senior Software Engineer

Maestro

Jun 2022 - Apr 2023 (11 months)

- Technologies: React, Next.js, Stripe, WebRTC, Node.js, Express.js, MongoDB, AWS, JWT
- Description: I've developed this interactive video platform using React.js, Styled Components, Next.js, Node.js, MongoDB, and AWS to create an intuitive and responsive user interface. The platform's features, such as two-way communication, personalized experiences, and business insights, are likely implemented via a combination of custom React components and third-party libraries. The real-time nature of the live streaming service might employ technologies like WebSockets or WebRTC for real-time communication, which would be seamlessly integrated with React. Given the high-profile clientele and the data-driven nature of the platform, significant emphasis would be put on security, scalability, and performance optimization in the React application.

Full Stack Engineer

Dynaboard

Jan 2020 - Jan 2023 (3 years 1 month)

- Technologies : React, Next.js, TailwindCSS, Python, Flask, PostgreSQL, Azure DevOps
- Description: During my tenure working on this project, I employed my deep knowledge of React, Next.js, Vercel, Python, Flask, PostgreSQL, and Azure DevOps to implement an intuitive drag-and-drop feature, enhancing the user experience significantly. By leveraging libraries such as React DnD, I was able to construct a fluid, interactive interface that seamlessly facilitated the reordering of UI elements. This functionality allowed users to personalize their interface, a key requirement for a platform focused

on collaboration and customizability. Furthermore, I ensured that the drag-and-drop feature worked harmoniously with the real-time code collaboration tools, integrations, and other components of the application. By prioritizing performance and security, I contributed to the delivery of a top-tier web application development platform used by engineers, analysts, and business stakeholders alike.

Senior Frontend Developer

MedHub

May 2021 - Aug 2022 (1 year 4 months)

- Technologies: React, Typescript, Next.js, Styled-components
- Description: It was a rewarding collaboration between skilled engineers, designers, and healthcare professionals. Leveraging user-centric design and cutting-edge technologies like React, Typescript, and Next.js, we've created a scalable, maintainable, and visually appealing platform. Adhering to best practices and Agile methodologies, we've ensured the platform's stability and responsiveness to user feedback, ultimately delivering an exceptional healthcare experience for patients, providers, and administrators alike.

Frontend Developer

CurisTech

Jan 2018 - Mar 2020 (2 years 3 months)

- Technologies Used: Angular, Typescript, Ngx-Bootstrap, JWT
- CurisTech is a cloud-based software application that improves the efficiency, flow and ease of communication within home healthcare agencies.
- Developed frontend using Angular 14.0 and TypeScript.
- Built a responsive UI using HTML, CSS and Ngx-Bootstrap.
- Implemented JWT-token authentication for creating login method.

React / Three.js Developer

Morroccos

Mar 2016 - Apr 2019 (3 years 2 months)

- Technologies Used: React, GSAP, React Three Fiber, Strapi CMS, Shopify Storefront, Three.js, WebGL.
- Description: Developed a captivating storytelling 3D experience for Morroccos. The website showcased a fusion of 3D elements, interactive maps, and integrated a Shopify storefront for e-commerce functionality. React Three Fiber, Three.js, and WebGL were utilized to create visually stunning 3D scenes and immersive environments. GSAP was used to animate elements and enhance user interactions. The project also incorporated Strapi CMS for seamless content management and Shopify Storefront for a seamless integration with the e-commerce platform.

Education

CareerFoundry

Certificate, Fullstack Web Development

2019 - 2019

University of Utah College of Social and Behavioral Science

Bachelor's degree, Computer Science

Mar 2010 - Mar 2014

Skills

React.js • Next.js • Angular • React Native • styled-components • Vercel • GraphQL • Contentful
• TypeScript • Flask
